

Integrative Biology C32 Class Number # 22513
L&S Discovery Course C30Z Number # 22506
3 UNITS

Course may be used to satisfy the Biological Science breadth requirement in Letters and Science
Lower Division

BIOINSPIRED DESIGN

Spring 2020

Website: <http://biodesign.berkeley.edu/bioinspired-design-course/>

Instructor

Professor Robert Full
5128 VLSB
Office hours: Monday & Wednesday 1:00-2:00 PM
Phone: 510-642-9896; e-mail: rjfull@berkeley.edu

GSIs

Andrew Saintsing
Office hours: Wed 10-11AM, 1099 VLSB
e-mail: andrew_saintsing@berkeley.edu; phone: 510-643-5183
Leah Lee
Office hours: Mon. 4-5 PM, 1099 VLSB
e-mail: leah_lee@berkeley.edu; phone: 510-229-0544
Ali Bhatti
Office hours: Tues. 10-11 AM, 1099 VLSB
e-mail: haideralibhatti@berkeley.edu; phone: 201-567-4211
Erik Sathe
Office hours: Mon. 10-11AM, 1099 VLSB
e-mail: eksathe@berkeley.edu; phone: 952-451-7708

Research Assistant

Rubi Ruopp
e-mail: rruopp@berkeley.edu

Student Mentors

We are currently recruiting student mentors.

Prerequisites: None. Open to all students.

Textbook: None: On Reserve, Vogel, Steven. *Cats' paws and catapults: Mechanical worlds of nature and people*. WW Norton & Company, 2000.

bCourses Site:

We will use the IB 32 bCourses site for the syllabus, reading assignments, announcements, presentations and lecture material. You may access the site by going to:
<https://bcourses.berkeley.edu>, login through CalNet and then to Integbi C32 or L&S C30Z
When viewing Assignments, please be sure to sort by due date. To view a list of assignments with points in chronological order, please see:
<https://bcourses.berkeley.edu/courses/1487597/pages/assignment-due-date-checklist>

Meeting time and place: Monday & Wednesday. 245 Li Ka Shing. 12:00PM - 1:00PM

Discussion sections:

One hour per week
INTEGRATIVE BIOLOGY C32 S 101 DIS; 22514; Fr 9-10A, 220 Jacobs Hall

LETTERS & SCIENCE C30Z S 106 DIS; 22512; Fr 2-3P, 220 Jacobs Hall

Rationale: Bioinspired design views the process of how we learn from Nature as an innovation strategy translating principles of function, performance and aesthetics from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in our **Design Innovation Institute in Jacobs Hall**. Project teams will have opportunities to learn about team dynamics and how to make a successful team. Lectures will address the biomimicry design process from original scientific breakthroughs to entrepreneurial start-ups using case studies that include gecko-inspired adhesives, robots that run, fly and swim, artificial muscles, computer animation, medical devices and prosthetics while highlighting health, the environment, and safety.

Team Connections. Before most Monday classes, design teams will add a **Connection link** via a weblink provided in the relevant bCourses Assignment to share Bioinspired Design connections. These URLs can include relevant design or biology courses on campus; links to campus organizations, clubs, institutes and competitions interested in design; biological discoveries and bioinspired designs from news and journals; global research, centers, and institutes; and internships, public service, and research opportunities. Each team is responsible to check and make sure their Connection has been registered on the website. If it is not there, you will not receive credit.

Individual Connections. You will also be asked to vote/LIKE at least one Connection Link that you find interesting or useful from the past week only. You will NOT be assessed based on the number of LIKES you provide. Additional information will be provided in the relevant bCourses Assignment.

Bioinspired Design Projects: Four bioinspired design opportunities will be offered.

1. Print a Prosthetic Hand for Children. Early Makerspace experience.

2. Create a Gecko-inspired adhesive. In the first session, teams will manufacture a gecko inspired adhesive and analyze the adhesive. In the second design session, teams will use their gecko-inspired adhesive as a design tool to propose a new product.

3. Build a Legged Robot. In the first session, teams will construct a legged robot provided by DASH Robotics. In the second design session, teams will use their robot as a design platform to propose a new product.

4. Novel Bioinspired Design. The final exam will be a 5 min video and poster of a bioinspired design of your team's choice. Teams will select a journal publication with a biological discovery and extract the principle. Teams will then create a mock-up, prototype, and/or computer simulation/animation in combination with the setting in which your design is to be used. Designs should include possible societal impacts (health, fitness, environment, safety, security, education, connections to others or community, assisting underserved, disabled populations or underdeveloped countries, sports and entertainment). Resources from Jacobs Hall will be available. The video must be posted to the assignment page in bCourses by 6PM on May 2nd. (You will NOT have a written

exam during the May 13 slot.) Your poster should be printed as early as possible before the Showcase. Design Showcase Presentations will likely be May 5 or 6th in Jacobs Hall.

Maker Pass. All students will be required to get a Maker Pass for Jacobs Hall. To get your Maker Pass you must pass an online General Workshop Safety training and pay a \$75 semester access fee to activate your Maker Pass (fee waivers are available for students with financial need). Detailed instructions can be found at makerpass.jacobshall.org.

iClickers. The iClicker is a fun and effective tool for promoting engagement and interaction in the classroom. iClicker is a personal response system that allows you to respond to questions that are posed during class, and you will be graded on that feedback and class participation. iClicker questions will be given every lecture, so if you miss the lecture, you will miss points. You are responsible for bringing your remote to each class beginning Feb 3. We grant 5 unexcused absences from lecture with respect to iClicker questions before points are lost. If you forget your iClicker after your 5th unexcused absence, but attended, please take a photo with a GSI and send them the photo. You are required to purchase an iClicker remote for in-class participation. It is recommended to bring two spare AAA batteries. You will need to register your iClicker remote online. If you bought your iClicker used or borrowed it, it will probably have been registered to the previous owner. You need to re-register it in your name. iClicker registration is found near the bottom of the menu on the left-hand side of the main bCourses page, just above "Settings".

The remote ID is the series of numbers and sometimes letters found on the bottom of the back of your iClicker remote. The iClicker frequency used in this class will be "AA", but this may be subject to change. **iClicker technical support.** Do not ask the professor or GSIs for technical assistance or for repairs as they do not have the expertise. If your iClicker is defective, it is your responsibility to have it repaired or replace it. The UCB student iClicker information page is at <https://www.ets.berkeley.edu/services-facilities/clickers/students-getting-started>.

Conversing with others about iClicker questions is not only permitted, it is encouraged. However, you must submit your own answer with your own registered iClicker. Using someone else's iClicker is considered cheating by both the user and the owner of the iClicker. GSIs will monitor for multiple iClicker use.

Grading (620 points)

Your grade will be determined by:

- 20 pts (~3%): Team *Connection* links (Points for web surfing!)
- 20 pts (~3%): Individual *Connection* tracking (Points for LIKING content!)
- 34 pts (~5%): Class participation (iClicker responses)
- 30 pts (~5%): Team Makerspace Activity (prosthetic hand)
- 120 pts (~20%): Midterm (In-class multiple choice)
- 30 pts (~5%): Individual Design Assignments (Decompose 2 papers)
- 90 pts (~15%): Team Design Project #1 Gecko-inspired adhesive
- 90 pts (~15%): Team Design Project #2 Legged robot
- 180 pts (~30%): Team Final Design Project #3 (5 min team video and poster)
- 15 pts (~2%): Extra Points for Questionnaires if response rates are greater than 75% for each.

Tentative Assignment Due Date Check List. We have created a check list to help you track each point. <https://bcourses.berkeley.edu/courses/1487597/pages/tentative-assignment-due-date-checklist>

Late assignments will be deducted 3 points for every day past the deadline. Final grades are based both on an absolute scale, as well as a curve, along with potential positive effort adjustments. Our absolute percentage scale is 100-90 A; 90-80 B; 80-70 C; 70-60 D; <60 F. Curve – In the unlikely event that assignments or grading show that the absolute scale

is too high, we will lower the curve (e.g. 100-85 A; 85-75 B; etc; We will not raise it to make it more difficult to get a grade). At the end of the semester, we will all meet to discuss any student who is in the gray zone between grades. If you have shown high attendance, effort, engagement, and improvement, you will receive the next higher grade. We will not reduce a student's grade to a lower grade.

Communication

Piazza - Online Discussion Forum

We will use *Piazza* as our online forum. Please sign up.

Piazza is your main venue to ask questions, discuss problems, and help each other out.

Social Media

Facebook

a. Follow our HHMI Bioinspired Design page for program updates:

<https://www.facebook.com/bioinspiredesign/>

b. Follow the Bio-Inspired Design @ Berkeley RSO page for group updates:

<https://www.facebook.com/BioD.berkeley/>

Instagram

a. When posting Bioinspired Design course or related images and video, please tag

[@hhmi_bioinspired_design](#) and add #HHMIBioinspiredDesign

b. Please feel free to follow us [@hhmi_bioinspired_design](#) so that we can follow you in return.

Twitter

a. When tweeting a Bioinspired Design course or related post, please mention

[@HHMIBioDesign](#) and add #HHMIBioinspiredDesign

b. Please feel free to follow us at [@HHMIBioDesign](#) so that we can follow you in return.

Box

We will be using Box for collaborative storage and workspaces. Once you are assigned to a Design Team, you will be notified of a shared folder for your team members.

Join Berkeley's BioDesign Community RSO. Belong to a fun and exciting club to explore your interests, participate in events, and meet others. All are welcome. There are opportunities to be an officer in the future.

<http://biodesign.berkeley.edu/berkeley-biodesign-community/>

Policies & Conduct

The student community at UC Berkeley has adopted the following Honor Code.

"As a member of the UC Berkeley community, I act with honesty, integrity, and respect for others." The expectation is that you will adhere to this code, as your instructors pledge to do as well. For more information, please visit this website:

<https://teaching.berkeley.edu/berkeley-honor-code>

Policy on UC Berkeley's Code of Student Conduct. All students are expected to follow the University of California at Berkeley's Campus Code of Student Conduct, as is published at <http://sa.berkeley.edu/uga/codeofconduct>. Cheating, plagiarism, or any other form of academic dishonesty will not be tolerated (102.01).

Policy on plagiarism. In academia ideas are our commodity. Taking direct text or ideas or data or results from someone else's work without properly giving credit is essentially stealing. Representing them as your own is unethical and disrespectful. This is unacceptable in a university and we take it very seriously here at UC Berkeley. We will pursue disciplinary action against students who plagiarize in this class.

Policy on accommodation of religious holidays and other scheduling conflicts: In compliance with Education code, Section 92640(a), it is the official policy of the University

of California at Berkeley to permit any student to undergo a test or examination, without penalty, at a time when that activity would not violate the student's religious creed, unless administering the examination at an alternative time would impose an undue hardship which could not reasonably have been avoided. All deadlines and the midterm exam date (Feb. 26) are noted on this syllabus. It is your responsibility to note any conflicts with the exam and due dates and let the instructor and GSIs know. If you have other scheduling conflicts, please see the guidelines at: <https://teaching.berkeley.edu/academic-calendar-and-student-accommodations-campus-policies-and-guidelines>

Note: [If you are on an athletic team or participate on a club sport and your schedule requires that you miss our midterm \(Feb. 26\) or participatory discussion sections that can't be made up \(Feb. 14, 28; Mar. 13\), we recommend that you do not take the class. For any other session missed, please submit a letter from the athletic or club sport director.](#)

Policy on exam. We will not administer a make-up midterm exam. If you have to miss an exam for a valid, unforeseeable and urgent reason, your grade will be pro-rated. If you do find yourself facing an unforeseen emergency, please contact us as soon as possible to let us know. Documentation will be required. Please note: this policy is for valid emergencies. Students are otherwise expected to complete all assignments. While we will remind you about exam logistics, you are responsible for making sure that you complete every question and turn in the exam before you leave the room in which it is administered. We will not accept your exam after you have left the classroom.

Policy on design assignments. A documented illness or some other unforeseeable emergency will allow us to grant you a later due date for a design assignment than what is posted on this syllabus or in a bCourses Announcement. Anticipated events do not count as acceptable reasons for turning in your assignment late as you can and should plan ahead and turn your assignment in early. If your assignment is late, please still submit as soon as possible. You will lose points for each day late.

Policy on attendance for lecture. The course structure assumes you will attend all lectures. That said, be advised that the midterm exam content will primarily derive from lectures. It is *strongly* recommended that you do not skip lecture. iClicker questions will be given every lecture, so if you miss the lecture, you will lose points. We grant 5 unexcused absences from lecture with respect to iClicker questions before points are lost.

Policy on attendance for discussion section. The course structure assumes you will attend all discussions section periods. Design project attendance is mandatory and is part of your grade. It is *strongly* recommended that you do not skip your discussion section.

Policy on cell phones. All cell phones need to be silenced during class. We all understand that there may be occasional situations in which you need to receive or send a text, but keep in mind that excessive texting or other use of your phones is distracting to other people in the class. If your cell phone activity becomes disruptive, you will be asked to leave the class. Cell phones must be turned off and put away during the midterm exam. If you use your phone (even if it just rings) during an exam you will be asked to leave and you will receive a zero on the exam.

Policy on students with learning disabilities. Disabled students please make certain that your letter from the Disabled Students Program is sent to the instructor at least 2 weeks in advance of the midterm exam so that appropriate accommodations can be made. See <http://dsp.berkeley.edu>

Policy on recording lectures. Lectures may NOT be recorded using audio or photographic equipment without the prior written permission of Professor Full or by formal recommendation of the Disabled Students' Program. Video recordings are expressly prohibited by University of California policy. Lectures are comprised of copyrighted intellectual material, and the recording and sharing of that material without express permission is a violation of copyright and personal privacy. Additionally, the discussion of sensitive issues in this class requires that students feel safe to express their opinions without fear of future reprisal or exposure. Students caught recording course lectures using cameras, audio, or video equipment without prior notification and permission will be

asked to leave the class. In addition, it is a violation of copyright to sell notes, assignments or exams to on-line companies.

Questionnaires and self-reports. You will be asked to take part in a series of questionnaires to help improve the course. These are anonymous and you are not required to answer all questions. You will be given 15 extra points if all surveys attain over 75% response rates. Surveys have IRB approval.

Integrative Biology C32; L&S Discovery Course C30Z

TENTATIVE COURSE SCHEDULE, Spring 2020

Date	Lecture (245 Li Ka Shing)	Discussion (220 Jacobs Hall)
22 January	1. Introduction	
24 January		1. Introduction & orientation; Literature searching; Assign Gecko paper #1
27 January	2. BioDiscovery - How to discover Nature's principles?	Publish Teaming Survey
29 January	3. BioDesign - How do I design from Nature?	
31 January		2. Form Teams; Assign Gecko paper #2; Early Maker Space Activity
3 February	4. BioConstraints - How are Nature's designs compromised?	
5 February	5. BioSelection - How do I select the best inspiration?	
7 February		3. Review Assignment #2. Discovery Decomposition & Analogy Check. Assignment #3 Select own publication / do Decomposition and Check; Teaming tools
10 February	6. BioScaling - How do I consider size?	
12 February	7. BioComplexity - How to simplify & extract principles?	
14 February		4. Hand Assembly. Assist with Assignment #3.
17 February	Holiday	
19 February	8. BioAdhesion	
21 February		5. Review Assignment #3; Help for Midterm
24 February	9. BioAdhesion - Gecko	
26 February	10. Midterm Exam	
28 February		6. Gecko adhesive design project Part 1
2 March	11. BioMotion-Walk	
4 March	12. BioMotion-Running	
6 March		7. Gecko adhesive design project Part 2
9 March	13. BioControl	
11 March	14. BioSensing	
13 March		8. DASH robot design project Part 1
16 March	15. BioPower - Nature	
18 March	16. BioPower - Technology	
20 March		9. DASH robot design project Part 2
23 March	Spring Vacation	

25 March	Spring Vacation	
27 March	Spring Vacation	
30 March	17. BioMaterials	
1 April	18. BioMotion-Swim	
3 April		10. Final Design Project. Suggest bio paper for final project.
6 April	19. BioMotion-Fly	
8 April	20. BioProsthetics	
10 April		11. Work on final project; Teaming Exercises
13 April	21. BioAnimation	
15 April	22. BioGreenChem	
17 April		12. Work on final project
20 April	23. Space Exploration – NASA Materials	
22 April	24. BioArchitecture	
24 April		13. Work on final project
27 April	25. BioEntrepreneurship – Dash Robotics	
29 April	26. Summary	
2 May		Submit final video project
